

BENJAMÍN FLORES BRAVO

Full Stack Developer | React · Node.js · Docker · Cloud (Azure/DigitalOcean)

Concepción, Chile | +569 5040 1247 | benjaf243@gmail.com | [github.com/Venjyy](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Developer with experience designing, building, and deploying ERP systems, REST APIs, and microservices architectures. Specialized in React, Node.js, Express, and MySQL, with hands-on experience containerizing applications with Docker, version control with Git, and cloud deployment (Azure, DigitalOcean). Proven track record migrating monolithic systems to microservices, integrating third-party APIs (payments, weather, authentication, attendance tracking), and applying security best practices (JWT, input validation, SQL injection prevention). Focused on continuous process improvement, data quality, and CI/CD practices, with basic Linux administration skills.

TECHNICAL SKILLS

- Languages:** JavaScript, Python, TypeScript (basic), SQL, HTML5, CSS3, C#.
- Frontend:** React.js, React Hooks, Context API, responsive design, reusable component architecture
- Backend:** Node.js, Express.js, ASP.NET MVC, Entity Framework, REST APIs, JWT authentication, microservices architecture
- Databases:** MySQL, SQL Server, relational data modeling, SQL query optimization
- DevOps / Cloud:** Docker, Docker Compose, CI/CD, Git/GitHub, deployment on Azure and DigitalOcean, basic Linux administration
- Integrations:** Third-party APIs (GeoVictoria, Khipu, Meteored, Gmail API), Webhooks, OAuth/JWT authentication
- Security:** Input validation, SQL injection prevention, secure token and credential handling
- Practices:** Agile methodologies (Scrum/Kanban), data quality control, technical documentation
- Languages Spoken:** Spanish (native), English B2 (upper-intermediate)

PROFESSIONAL EXPERIENCE

Full Stack Developer — Dafa Facility — iDafa Connect *Coronel, Chile | Jun. 2025 – Jan. 2026*
ERP system for human resources, accounting, and risk-prevention management.

- Led the design and full migration of a monolithic architecture to microservices using Docker (backend and database), cutting deployment time by 60% and improving system scalability.
- Developed and maintained an ERP system for HR and accounting used by 10 internal users, streamlining administrative processes by 45%.
- Redesigned the React frontend with a configurable, white-label visual identity per company, improving user satisfaction and reducing support tickets by 50%.
- Implemented 8 new functional modules based on business requirements, delivered on schedule.
- Designed and built REST APIs in Node.js and modeled MySQL databases, processing 700+ requests/day with optimized response times.
- Configured reproducible development and testing environments and supported CI/CD adoption, reducing deployment errors by 40%.
- Securely integrated the GeoVictoria API for attendance tracking, automating time-tracking for 30+ employees.
- Improved data quality, normalization, and standardization across the system, reducing inconsistencies by 35%.

Tech stack: React, Node.js, MySQL, Docker, Git, Postman, Claude Agent.

Full Stack Developer & Consultant — El Patio de Lea *Concepción, Chile | Feb. 2025 – Dec. 2025*

- Built an end-to-end web reservation and event management system, increasing digitally managed bookings by 80%.
- Developed the React frontend and Node.js + Express backend, designing REST APIs with JWT authentication for 50+ concurrent users.
- Modeled and optimized MySQL queries, improving query response times by 40%.
- Deployed and managed infrastructure on DigitalOcean, configuring production environments and environment variables to ensure 99.5% uptime.
- Integrated third-party APIs: Khipu (payments), Meteored (weather), and Gmail API (automated notifications), cutting manual management time by 50%.
- Applied security best practices — input validation, SQL injection protection, and secure token handling — with zero reported security incidents.

Inclusive Learning Mentor — Instituto Santo Tomás *Concepción, Chile | Mar. 2025 – Jul. 2025*

- Provided personalized academic support to 1 student with disabilities/vulnerable circumstances, improving academic performance and achieving a successful semester completion.
- Developed interpersonal skills, empathy, and effective communication in educational settings, strengthening soft skills transferable to team-based work.

EDUCATION

B.S. in Computer Engineering (3rd year) — Instituto Santo Tomás, Concepción, Chile
2024 – Present
